

Wyoming Client Information System - FY2016

Electronic Data Collection and Reporting for Wyoming State

WCIS reporting is one less thing you have to worry about. ClinicTracker has you covered in 2016 and beyond.

Let ClinicTracker Handle Your State Reporting

ClinicTracker incorporates WCIS 2016 reporting standards into our system, which allows you to spend more time on client care and less time gathering data for state reporting. Wyoming Client Information System (WCIS) reporting includes client demographics, client services, client outcome, and performance data. ClinicTracker gathers all necessary information in the simplest possible format and validates data for accuracy according to the detailed state specifications. With just a few clicks of the mouse, the system prepares WCIS data in the required format for submission to the Wyoming Department of Health.

ClinicTracker eases the heavy burden of state reporting using intuitive forms and reporting capabilities that allow you to focus more time on client care and less on administrative overhead.
