JAG Product's ClinicTracker Connect Receives
ONC-ATCB Certification by Drummond Group

(5/24/2012 -- Syracuse, NY) – JAG Product's ClinicTracker Connect has received the federal government's "meaningful use" stamp of approval by earning Complete EHR certification. The designation officially deems the electronic health record (EHR) software capable of enabling providers to qualify for funding under the American Recovery and Reinvestment Act (ARRA). Tested and certified under the Drummond Group's Electronic Health Records Office of the National Coordinator Authorized Testing and Certification Body (ONC-ATCB) program, the EHR software is 2011/2012 compliant in accordance with the criteria adopted by the Secretary of Health and Human Services.

 "The certification validates that our software can help behavioral healthcare providers take part in the revolutionary changes that are affecting the healthcare industry. Our customers can now use ClinicTracker Connect to not only greatly increase the level of care, efficiency, and regulatory compliance, but now also to achieve Meaningful Use and qualify for incentive funds under ARRA. We are proud to offer ClinicTracker Connect, certified for Meaningful Use, as a perfect solution to the pressing issues of managing a behavioral health clinic to our current and future customers." says Mark Shriro, Director of Marketing.

Drummond Group's ONC-ATCB 2011/2012 certification program tests and certifies that EHRs meet the meaningful use criteria for either eligible provider or hospital technology. In turn, healthcare providers using the EHR systems of certified vendors are qualified to receive federal stimulus monies upon demonstrating meaningful use of the technology -- a key component of the federal government's push to improve clinical care delivery through the adoption and effective use of EHRs by U.S. healthcare providers.

ClinicTracker Connect, which met the requirements for Complete Ambulatory EHR was developed to address the special challenges inherent in managing mental health and substance abuse agencies. Unlike typical medical practice solutions that have little relevance to the everyday needs of a MH or SA operation, ClinicTracker Connect offers a finely-tuned infrastructure that manages every aspect of your agency. From intake to discharge, ClinicTracker Connect manages documentation, compliance, messaging, scheduling, billing, reporting, accounting integration, and more while allowing for mobile access, ePrescribing, signature capture, and a host of other features. You can enhance patient care, improve staff efficiency, eliminate paper, and increase your profitability with ClinicTracker Connect.

"The need to leverage information technology in the healthcare industry is huge – as the quality of care and efficiency benefits that come with computerization can really make a difference in the overall patient experience. We're ready to help transform the industry by providing the sophisticated software testing services that ensure that vendors and hospitals are offering systems that are capable of meeting the meaningful use standards

required to obtain incentive funds as well as the rich functionality required to move the clinical care needle forward," says Rik Drummond, CEO of the Drummond Group. "We have been testing software for more than a decade and are ready to leverage our extensive experience handling sophisticated systems in complex industries as well as dealing with complicated technical issues such as interoperability and security."

This Complete EHR is 2011/2012 compliant and has been certified by Drummond Group, an ONC-ATCB approved to certify any complete or modular EHR both ambulatory and inpatient, in accordance with the applicable certification criteria adopted by the Secretary of Health and Human Services. This certification does not represent an endorsement by the U.S. Department of Health and Human Services or guarantee the receipt of incentive payments.
