

ClinicTracker

ProBundle Plan

PROFESSIONAL SUPPORT WHEN YOU NEED IT MOST

Running a behavioral health clinic means constantly adapting, whether you're rolling out new services, hiring staff, or navigating regulatory shifts. The ProBundle Plan from ClinicTracker is designed to give you consistent, affordable access to expert help when you need it most.

With ProBundle, you'll never feel stuck or short-staffed. Instead of scrambling to solve problems on your own, you can lean on our team to help you build, train, optimize, and innovate.

A Plan Built for Real-World Challenges

Your clinic's needs don't follow a perfect schedule. That's why ProBundle offers a mix of upfront hours for immediate needs and monthly hours that roll in regularly to keep your momentum going. If you hit a busy season or a big project comes up, you can purchase add-on hours at your discounted rate.

What You Can Use It For

Use your ProBundle hours to:

- **Implement or expand your ClinicTracker system**
- **Train new staff or retrain existing teams**
- **Build custom forms, reports, and workflows**
- **Adapt to changing billing and compliance standards**
- **Create software tools that enhance your operations**

You focus on care, we'll handle the technical side.

Why ProBundle Makes Sense

We created ProBundle to offer clinics like yours a smarter, more cost-effective way to get expert services:

- **Plans are predictable:** you always know what to budget.
- **They're discounted:** you save up to 33% compared to standard hourly rates.
- **And they're flexible:** your hours never expire, and you can scale up as needed.

After your 12-month initial term, your plan automatically shifts to a month-to-month agreement, giving you the freedom to cancel or adjust anytime before your next billing cycle begins.

Get Started Today!

Choose your ProBundle Plan today and keep your clinic moving forward with affordable, on-demand expertise. Whether you're planning your next big step or just want peace of mind, we're here to help you make it happen.
