

Product Brief

Performance Measurement Reports

Automated alert system for executives and administrators

Receive regular emails with key clinical and billing metrics.

Successful management requires that you regularly monitor your operations.

Performance Measurement Reports: Overview

Welcome to Performance Measurement Reports – an exciting new practice management tool from ClinicTracker. We designed it as an effortless way for administrators to keep close tabs on their operations. You tell ClinicTracker what metrics you want to follow, and the system automatically emails you a complete report on whatever schedule you select. It’s a built-in warning system that keeps an eye on your business at all times—and you don’t have to lift a finger.

Follow key metrics and view historical trends graphically.

Performance Measurement Reports: Features

- Receive automated emails that report on whether the metrics you selected have fallen outside your acceptable range
- Choose which days of the week you'd like the software to email reports
- View, sort, and graph data within ClinicTracker
- Print or export charts in standard formats

Performance Measurement Report: Benefits

Let ClinicTracker take responsibility for providing you with scheduled status reports.

.....

Drive Business Performance

- Keep an eye on the flow of intakes, admissions, and discharges
- Track the number of active intakes and patient sessions per day
- Monitor kept vs. missed appointments

Keep Operations Healthy

- Oversee your agency's status even when you're busy managing other responsibilities
- Be proactive, not reactive, in making critical business decisions

Improve Financial Control

- Monitor the number of unbilled appointments
- Keep patient and insurer credit balances in check
- Make sure your staff is paying attention to applied payments and adjustments from patients/insurers

Stay Compliant

- Keep up with compliance workflow items, such as unsigned or missing progress notes
- Always be prepared for regulatory inspections
