TRIZETTO® Patient Statement Service

ClinicTracker Partners With TriZetto To Simplify Billing

Sending invoices just got easier.

The sooner statements go out, the faster you get paid

Patient Statement Service: Overview

We offer a secure solution for generating and mailing patient statements. Fully integrated into ClinicTracker, it reduces costs, gets bills out quicker, and improves cashflow – all with less effort and paperwork.

Patient Statement Service: Features and Benefits

Using our service can save you approximately 30 cents per statement. Why? Because it's far more efficient than any other method. Once you batch invoices in BillingTracker, you simply send the file to TriZetto with the click of a button. They handle the rest. That means they'll take care of printing the statements and sending them out. You don't have to worry about address labels, stamps, printing costs, or getting statements in the mail. Those tasks are no longer your responsibility. As far as your patients are concerned, they're getting the bill from you. And they can pay you however they wish: by mailing a check, making an in-person cash or credit card payment, or using the payment features within ClinicTracker's Patient Portal. They get a professional-looking bill that's always on time and convenient to pay.

Struggling to manage patient billing? Burdened by administrative overhead?
