Create, administer, and analyze rating scales

Using rating scales to evaluate symptoms, impairment, and treatment response has become the standard of care. However, administering and scoring tests is often complicated and time-consuming.

Simplify the entire process with the ClinicTracker Testing Wizard:

- Create and edit tests with a simple interface
- Create on-screen instructions
- Select item formats:
 - True/false
 - Multiple choice
 - Ranges
- Create subscales for scoring purposes
- Set impairment cut-offs for total and subscale scores
- Generate an unlimited number of questions, set up a scoring system, and rearrange the order of questions

Streamline test administration:

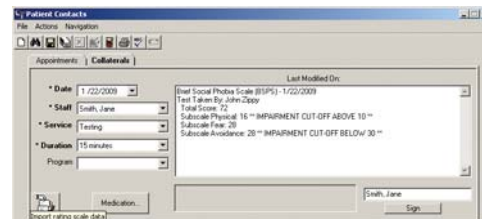

- Staff can administer tests or patients can respond directly on your office computer
- Fully integrated with ClinicTracker Connect
- One click of the mouse moves you from any patient record to test administration
- Tests are automatically scored as they are completed
- Built-in reporting makes presenting test results uncomplicated and compelling

Test profiles include:

- Total scores
- Subscale scores
- Performance by patient groups

Integrated test analysis:

- Import rating scales into Progress Notes or Collateral documentation
- Generate complete response analysis or summaries of totals and subscales
- Display graphical reports for individual clients, groups of clients, or your entire clinic
- Track trends over time

Testing Wizard helps you streamline the testing process and improve patient care.
